

### Tiny Steps

This week in Tiny Steps some of the children were excited to make marshmallows from playdough and toast them on the campfire. We then found some real marshmallows to toast and talk about our home experience.

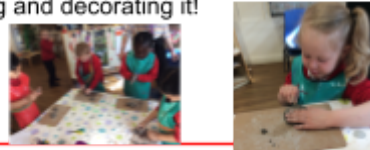

### Nursery:

There's been great excitement in our EY's playground this week. This led to us making our own roads and exploring how to attach things together.

### Reception:

Reception have made their very own clay goats and trolls from the Billy Goats Gruff story we have been learning. They modelled and shaped the clay before painting and decorating it!

### Nessgate:

This week **Nessgate** were very excited to receive a visit from **YoYo!** We listened to the **Christian Creation Story** then discussed what we can do to help care for and look after the world.

### Cook School:

In enrichment Y5 have been cooking Indian Takeaway food including curry, naan bread and bhajjis.

### Spanish:

Y3 and Y4 have been learning the days of the week off by heart - and we've nearly cracked it. Repetition using games, songs, puzzles and quizzes as well as a brilliant attitude to learning has really helped!

### Music:

Year 1 children worked with a fun online rhythm game using the sound patterns of **sun** and **flowers**. They followed and played from a graphic score, improvised rhythm patterns with call and response activities then soloists led a call and response game. We were delighted to use the year 1 box of instruments again. It felt like such a treat.

### Fossgate:

This week Fossgate have enjoyed taking their learning outside. With a visit to Greenfields and Forest Schools on Tuesday and a history treasure hunt on the playground on Thursday.

### Whip-Ma-Whop-Ma-Gate:

This week we re-enacted the first flight and learnt all about the Wright Brothers! We created our own airstrip and pretended to be commentators interviewing people about the amazing event.

### Fishergate:

We re-enacted the first flight engine powered flight by the Wright brothers in 1903. We investigated the brothers, Wilbur and Orville Wright, and took a quiz to see what we had found out about these magnificent inventors!

### ERP:

In ERP1 we have had dragons in our classroom! Our class book has been The Dragon Machine. We found a mysterious egg in the Forest School and looked after it carefully. Two baby dragons hatched from it and we have been looking after them all week. We have enjoyed making Dragon Land maps, describing and drawing dragons and next week we are designing and making our own dragon machines.

### Gillygate

The highlight of our week was a visit to Greenfields where we used our senses to help us write nature poems. We have also continued to read our class book King of the Sky and have been using maps to learn about Wales which is where the story is set.

### Micklegate

Micklegate have been learning all about different habitats this week, identifying how animals and plants have adapted to live in them. In Maths, we have explored more fractions, comparing and ordering. Our English writing has been planning a leaflet encouraging readers to visit Paris. We are extremely persuasive in Micklegate - some future careers in advertising!

### Stonegate

In Stonegate this week, we have been finding and plotting rivers, mountain ranges and deserts of the world. We have also been creating our own Geography based poster, which show the physical features of rivers. The children have also produced some fantastic first drafts of their persuasive leaflets, linked to the Titanic.
